ABOUT

"Che-Ché" was a beautiful white cat, a Turkish Angora, my beloved Pet [Feb.14,2013 ~ Mzo.17,2018] (05 years old). Unfortunately, he suddenly crossed the Rainbow during his romantic persecutions. It was a very sad episode that left the heart desolate in our Home!

... the time passes and the pain softens with resignation, remembering beautiful moments and the satisfaction of having given it a "nice life".

In my return to the Visual Arts, after 18 years of absence, "Che-Ché" has been that inspiration engine to translate and tribute him in several illustrations of Postal Art where I have participated in several Countries of the World during 2018. Many have been the mail_art Organizers that have allowed me (jointly and severally) my participation in a Digital manner due to the non-existence (temporary) of the International Public Mail in Venezuela and for reasons beyond our control. For this reason, I have had the great motivation and the endeavor to summon all those Visual Artists, Cat Lovers and people with plastic interests (of any age) who wish to participate in this Project of "Virtual Postal Art on Facebook®" ... I do not know if someone came up with the idea before but I think it's great, something different and new!
